

AHMED GUBRAN

SOC Analyst | Security Operations Analyst | SIEM & Incident Response

✉ ahmed.a2gubran@gmail.com ☎ +966 555606478 🔗 www.linkedin.com/in/18amd 🔄 medo-w (AHMED GUBRAN)

PROFILE

Cybersecurity graduate with a BSc (Hons) in Information Security and a CGPA of 3.55, with hands-on experience in SOC operations, security monitoring, alert analysis, and incident investigation. Skilled in analyzing logs, reviewing security alerts, identifying suspicious activities, and supporting incident response workflows. Familiar with SIEM and security tools including Microsoft Sentinel, Splunk, LogRhythm, Microsoft Defender, and CrowdStrike. Strong foundation in networking, Windows/Linux environments, web application security, access control, vulnerability assessment, and cloud security concepts. Passionate about Blue Team operations, threat detection, and continuous improvement of SOC processes and playbooks.

PROFESSIONAL EXPERIENCE

SOC Analyst Intern, *University SOC, Universiti Tun Hussein Onn Malaysia (UTHM)* | May 2025 – Jul 2025

Supported SOC operations by monitoring and reviewing security alerts, analyzing log data and security events, and identifying suspicious activities or potential incidents. Assisted in assessing alert severity, prioritizing incidents based on risk and impact, and supporting investigation activities by reviewing indicators, event details, and related system or network activity. Gained practical exposure to SIEM-based monitoring, alert triage, incident handling, SOC documentation, and escalation support.

Cybersecurity & IT Intern / IT Support, *Afwaj Al Haramain, Cyberjaya* | Aug 2025 - Jan 2026

Supported cybersecurity and IT operations by maintaining system reliability, user access, and basic security controls within a business environment. Contributed to secure web application practices by mitigating SQL injection risks using parameterized queries and addressing IDOR-related access control issues through improved authorization checks. Also assisted in troubleshooting Windows/Linux issues, system errors, network connectivity problems, data protection, and operational security improvements

EDUCATION

Bachelor of Computer Science (Information Security) with Honours | UTHM, Malaysia | Mar 2022 - Mar 2026

CGPA: 3.55 / 4.00

- **Academic Mobility Program - Faculty of Computer Science** | Brawijaya University, Indonesia | Sep 2024 - Nov 2024

GPA: 4.00 / 4.00

SKILLS

SOC Operations :Security Monitoring, Alert Triage, Alert Review, Incident Analysis, Incident Documentation, Escalation Support.

SIEM Tools: Microsoft Sentinel, Splunk, LogRhythm.

Tools: Wireshark, Volatility, EVE-NG.

Reporting: Incident Reports, Security Findings.

Cloud & Microsoft Security: Microsoft Azure, Office365 Security, Microsoft Defender, Cloud Security Fundamentals.

Networking: TCP/IP, LAN, WAN, DNS, HTTP/HTTPS, VPN, Firewalls, IDS/IPS.

Security Areas: Threat Detection, Vulnerability Assessment Penetration Testing Fundamentals.

CERTIFICATIONS

CompTIA Security+

CompTIA | Issued Apr 2026 |

eLearn Security Junior Penetration Tester (eJPTv2)

INE Security | Issued May 2026

Microsoft Certified Azure AI Fundamentals (AI-900)

Microsoft | Issued Dec 2024

HCIA-Security V4.0

Huawei | Issued Dec 2023 |

CCNA1

Cisco | Issued Sep 2023 |

Microsoft Certified: Power Platform Fundamentals (PL-900) -

Microsoft | Issued Sep 2023

PROJECTS

Afwaj Al Haramain Travel Website

08/2025 - 01/2026

Developed and maintained a secure travel booking website for Afwaj Al Haramain with a focus on secure web practices, data protection, access control, and service reliability. Implemented input validation and parameterized queries to reduce SQL injection risks, improved authorization checks to mitigate IDOR-related access control issues, and applied basic security controls to protect customer data and support stable business operations

Phishing URL Detection System Using XGBoost

05/2024 - 02/2025

Developed a machine learning-based solution to detect phishing URLs using XGBoost. Performed feature extraction and analysis to improve malicious URL identification and support early detection of phishing-related threats.

Design and Implementation of Zero Trust Network Architecture

01/2022 - 05/2022

Designed and simulated a Zero Trust network architecture in EVE-NG with network segmentation, access control, and continuous monitoring to evaluate security policies and reduce unauthorized access across the environment.
